

# Make a mini wildlife pond!

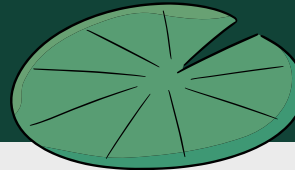

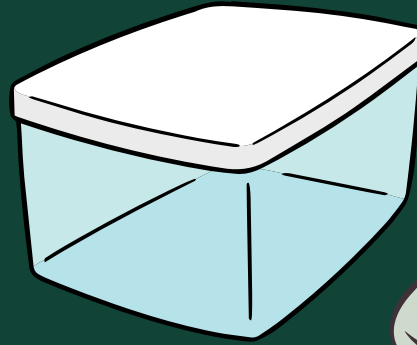

## You will need:

A watertight container - something like an old plastic tub or washing up bowl, maybe even an old sink, is perfect!

Rocks, pebbles & logs

Some pond plants

A trowel or spade to dig!

## How to make your mini wildlife pond

1. Find the perfect pond spot! It needs to get some sun, but not all day - so a little shade is perfect too.
2. Dig a hole if you want to sink your pond into the ground, and pop the container in. You can leave it sitting on the ground if you prefer.
3. Add a layer of gravel to the bottom, then place some rocks and logs around the sides. This can help any creatures using the pond to climb in and out easily.
4. Fill the pond with rainwater when you're ready!
5. Pop a few pond plants in.

Now's the time to sit and wait!  
How long do you think it will take for  
wildlife to come and check out  
your fab pond?
