- Dog treats (bone-shaped work best!)

Fancy serving up some cool tasty treats for your **feline friend**?

The simplest treat to make is by taking a portion of your cat's daily wet food and adding it to an ice cube tray. Freeze it overnight and your cat can indulge in their frozen morsel as they see fit! Or, why not freeze some spring water from a tin of tuna and add it to your kitty's water bowl? Not only will it cool their drink, it'll provide fun as they bat it around!

One way we can help keep our **small pets** cool in the hazy, hot days is with some tasty homemade treats! Our top recommendations are...

> Chop up some carrot, broccoli or banana and freeze it. Hide it in their home for them to find through some foraging and watch them enjoy a cool treat!

> Pop some kale, watermelon and ice cubes in a blender and smooth into a slushie. Pop it in your pet's water bowl and they can enjoy a refreshing drink.
